PRODUCT FEATURES

1. ON/OFF BUTTON

To turn the unit **ON**, press the **ON/OFF BUTTON**. To turn the unit **OFF**, press the **ON/OFF BUTTON** a second time.

2. WATER SENSOR

The **WATER SENSOR** is located on the top of the dolphin's head. To activate the water spraying effect, pour water on the dolphin's head, just above the mask, when the unit is first turned on.

Please note the following:

• Adult supervision is recommended when the spraying water is activated.
• Keep the speaker above the water for optimal sound quality. When the speaker is submerged in the water the sound will be muffled.
• The bottom of the dolphin must be submerged in the water to activate the motor that sprays the water.
• Do not submerge the water sensor in the water. If the water sensor is submerged, it will not work properly.

To preserve battery life, the **VTech® Swim & Splash Dolphin** will automatically power-down after approximately one minute without input. The unit can be turned on again by pressing any button.
Note: If the unit repeatedly powers down or the light flashes then fades out, we suggest changing the batteries.
